

# Webinar Report

**Topic: Java Interview Preparation**

**Date of Event: July 16,2020**

**Timings: 8pm-10pm**

*On July 22<sup>nd</sup>, Coding Blocks collaborated with Department of Computer Science and Applications, Panjab University to host a webinar on Java Interview Preparation. The session was mentored by Ms. Garima Chhikara.*

## **ABOUT THE EVENT:**

The keynote speaker was Ms. Garima Chhikara, Mentor at Coding Blocks. Around 83 students of our department attended the webinar. Ms. Garima started webinar stating the basics of Java. Java being one of the most popular among the OOPS languages becomes an integral part of technical tests as well as technical interview questioning during placement drives. Ms. Garima after brief explanation of importance of learning Java started with the questions that will be asked in interviews.

The topics on which questions were discussed were:

Java is Platform Independent programming language

Difference between JDK, JRE and JVM

Wrapper class in Java

Auto-boxing and Unboxing

Java access Specifiers

Static keyword

Inheritance(Multiple inheritance)

Constructor

Exception handling

Multithreading with synchronization

All questions for above said topics were discussed along with the code of implementation and suitable examples. It was an interactive session in which all the queries that students raised were answered. The session helped students to grab concepts of java in a way that it is addressed and questioned in tech interviews. A link to access the e-certificate was provided at the end of the session. It was a learning experience to be a part of the webinar.
